Letter from Admiral H. R. Stark to Admiral J. O. Richardson 22 November 1940.

(1) Confidential

November 22, 1940.

DEAR JO: While you were here in early October we sent a despatch to Comfourteen to accertain from Admiral Bloch whether or not the protection being afforded to the vital elements of the Naval Establishment in Hawali was satisfactory, this in order that, if required, we could make representations to the War Department to direct more thorough protection on the part of its Hawaiian Department.

Admiral Bloch's answers to this despatch and to a second despatch on the same subject were not very definite, and did not provide basis for further action by the Department.

Since the Taranto incident my concern for the safety of the Fleet in Pearl Harbor, already great, has become even greater. This concern has to do both with possible activities on the part of Japanese residents of Hawaii and with the possibilities of attack coming from overseas. By far the most profitable object of sudden attack in Hawaiian waters would be the Fleet units based in that area. Without question the safety of these units is paramount and imposes on the Commander-in-Chief and the forces afloat a responsibility in which he must receive the complete support of Commandant Fourteen, and of the Army. I realize most fully that you are giving this problem comprehensive thought. My object in writing you is to find out what steps the Nevy Department and the War Department should be taking to provide additional equipment and additional protective measures.

For instance, it is desirable to place torpedo nets within the harbor itself? I will appreciate your comments and those of Comfourteen on this question.

Antiaircraft protection can be provided first by units of the Fleet actually in Pearl Harbor with guns ready at all times; by stationing about the Nevy Yard of Army A.A. defense measures including mobile batteries; and possibly by utilization of Marine Defense Battalion Antiaircraft Units now available in the Pearl Herbor areas, or that could be made available. Also by keeping carrier fighters squadrons alerted and ready to go.

(2) Another aspect of local security which prompted the Department's original despatch was the security of the oil tanks against attack from the road passing near by.

I would like to have you take up the whole question upon your return to Hawaii with Comfourteen and with the Army, and let me know of any deficiencies which will require remedial action here in Washington.

Much is being done by the Army, and by the Navy in support of the /rmy, to maintain a security of the Panama Canal. Of at least equal importance is the security of our Fleet against sudden destructive attack. And the Fleet is, as usually must be the case, in a more exposed situation.

I have been in somewhat of a quandry whether to write this letter to you or to write one on similar lines to Admiral Bloch to take up with you and /rmy. It really is immaterial so long as we get the answer - but after all the Fleet - your command -

D. D. 1500-T-1

Letter from Admiral H. R. Stark to Admiral J. O. Richardson 22 November 1940.

is the subject. I am sending Admiral Bloch a copy.

My best to you both and to "all your works" -

Sincerely,

H.R.S.

AMERICAN - DUTCH - BRITISH CONVERSATIONS, APRIL 1941.

IV - ACTION OPEN TO THE ASSOCIATED POWERS.

- 28. To ensure that we are not diverted from the major object of the defeat of Germany and Italy, our main strategy in the Far East at the present time must be defensive. There, are, however, certain measures open to us which will assist greatly in the defence of our interests in the Far East, but which are themselves offensive.
- 29. It is important to organise air operations against Japanese occupied territory and against Japan herself. It is probable that her collapse will occur as a result of economic blockade, naval pressure and air bombardment. This latter form of pressure is the most direct and one which Japan particularly fears.

In addition to the defensive value of operation submarine and air forces from Luzon, referred to in pars. 21 above there is even greater value from the offensive point of view in holding this island. It is therefore recommended that the defences of Luzon should be strengthened and that every effort shou be made to maintain a bombing force in the island in addition to building up a similar force in China.

- 30. Other positive activities which may be undertaken are as follows:
 - (a) Support to the Chinese Regular Forces by financial aid and provision of equipment.
 - (b) Operation of Guerillas in China.
 - (c) Organisation of subversive activities in Japan.
- 31. So far as economic pressure is concerned, the entry of the United States of America, the British Empire, and the Netherlands East Indies into a war against Japan would automatically restrict Japanese trade to that with the coast of Asia. Since China will be in the war against her, and our submarine and air forces should be able to interfere considerably with trade from Thailand and Indo-China, a very large measure of economic blockade would thus be forced upon Japan from the outset.

(Page 1565, Part 15 "Pearl Harbor Attack")

MOST SECRET.

A.D.B. Page 25.

AMERICAN - DUTCH - BRITISH CONVERSATIONS, APRIL 1941.

VII - PLAN FOR EMPLOYMENT OF LAND AND AIR FORCES (contd.)

OTHER OPERATIONS.

. . . .

78. (a) Support to Chinese Regular Forces by financial aid, provision of equipment and establishment of military and air missions. A British nucleus Mission is already established, and a United States Mission possible combined with the British Mission

would be of considerable value, and it is recommended that preparations to establish it should now be made.

(b) The operating of Chinese Guerilla Forces armed, equippe
and directed by the Associated Powers. Steps have already been
taken by the British Government to organise such operations. It is recommended that the United States Government organise similar

guerilla forces.

(c) The organisation of subversive activities, sabotage and corruption in Japan and Japanese occupied territories. Activities of this kind are already being organised by the British Government. It is recommended that the United States Government should also undertake such activities and co-ordinate them closely with those of the British.

Defense Document 1500-T-5

Excerpt from the testimony of General George C. Marshall before the Joint Committee on the Investigation of the Pearl Harbor Attack - Congress of the United States, Seventy-Ninth Congress, Second Session - December 12, 1945.

Mr. KEEFE. And on the 10th of January 1941 the lease-lend bill was introduced in the Congress on March 11, 1941, that became law and we immediately began to give supplies under that to England and our other later allies did we not?

Yes, sir. General MARSHALL

rial aid, if you remember?
General MARSHALL. I do not recall the exact figures. I remember perticularly our maneuvering to get the planes for the Air Force out there operated under the meral Chennault.

Mr. KEEFE. General Channault was a former officer in the United

States Air Corps, was he not? General MARSHALL. Yes. He had resigned, I believe.

Mr. KEEFE. Resigned, and went over and became Mr Chief to

Chiang Kai-shek.
General MARSHALL. In the service of the Chinese Government. Mr. KEEFE. He recruited a good many Americans to go over to fly planes under his command?

General MARSHALL. Mes, sir. Mr. KEEFE. And planes were furnished to him by the United State

General MARSHALL. I do not remember the arrangements as to financing, but I know that I personally initiated the procedure, a proposed details which were followed out.

Mr. KEEFE. We perhaps loaned money to China and they then boug our planes. Is that what it was?

General MARSHALL. I would prefer not to answer that.

(3632) Mr. KEEFE. I see.

D. D. 1500-J-1 Letter from Admiral J. O. Richardson to Admiral H. R. Stark 28 November 1940. UNITED STATES FLEFT CinC File No. U.S.S. NEW MEXICO, Flagship Long Beach, California November 28, 1940 Dear Betty: Your last two letters, touching on the security of the Fleet while operating in the Hawaiian area and the prospective operations of the Second Brigade of the Fleet Marine Force with the Fleet during the third quarter have been received. With regard to the first of these matters, I will take this up with Bloch on my arrival back in Hawaii. This feature of the problem does not give me a great deal of concern and, I think, can be easily provided for. I think torpedo nets within the harbor are neither necessary nor practicable. The area is too restricted and ships, at present, are not moored within torpedo range of the entrance. The security of the units while carrying out routine operations gives me greater concern, because to provide a reasonable degree of security calls for employment of a great number of Fleet units for security alone, which will consume both time and effort that could, otherwise, be well directed toward training and indoctrination. I feel that the Fleet must operate on either of two assumptions, i.e., (a) that we are at peace and no security measures are required; or (b) that war time measures of security must be corried out. Here-tofore, we have carried out limited security measures largely as a basis for training and on the assumption that no foreign power would choose to bring on a war by an attack on the Fleet, but that some misdirected or fanatical nationals might undertake individual and irresponsible attack on Fleet units. Now, however, in the light of your concern over these matters and in view of your better information and position to evaluate the possibilities, I have come to the conclusion that I must operate on the basis of (b) above. I enclose a tentative draft of a directive which I plan to issue upon arrival at Pearl Harbor. It is bound to result in the curtailment of badly needed basic training of new personnel, particularly in de-stroyers and planes, and some degree of extra discomfort, but under the assumption, this will have to be accepted. In regard to the operations with the Second Brigade, Fleet Marine Force, we had originally planned on a tentative date of January 20. This was based on the readiness of the transports by January 1 and the Department's desire, as I understood it (See Cooke's memorandum to you of October 10) to fit these exercises into the international and diplomatic picture. I do not, of course, know to what extent the picture has been altered or how these exercises now fit in. As you will see later, this makes a great difference in their conception. According to our information, the last of the "CITY" transports will not be completed, at the yard, until January 23, with a fitting-out period of seven days at a navy yard PURL: http://www.legal-tools.org/doc/32e619/ D. D. 1500-U-1

Letter from Admiral J. O. Richardson to Admiral H. R. Stark 28 November 1940.

Cinc File No. UNITED STATES FLEET U.S.S. NEW MEXICO, Flagship

As I see it, the possibilities as to locale include:

Christmas Island -- if found suitable Polyman Island -- probably will limit force

Christmas Island -- if found suitable
Palmyra Island -- probably will limit force
that can be employed to less
than that available in six
transports.

One of Hawaiian Islands

Please let me know as soon as possible your decision as to the concept and scope of the exercises. I would also appreciate being informed as to the progress made in the conversion of the transports, the provision of landing boats, boat carriers, etc.

With best regards,

/s/ J. O. Richardson Sincerely,

Admiral H. R. Stark, U. S. Navy The Chief of Naval Operations Navy Department Washington, D. C. D. D. 1500-U-1

Defense Doc. 1500-U-3

Excerpt from Exhibit No. 37 of the Joint Committee on the Investigation of the Pearl Harbor Attack - Congress of the United States, Seventy-Ninth Congress, First Session.

EXHIBIT NO. 37

BASIC EXHIBIT OF DESPATCHES

(36) 27 November 1941 to CNO, Action: CINCAF, CINCPAC.

(36) Top Secret

November 7, 1941. From: Chief of Navel Operations Action: CINCAF, CINCPAC Info: CINCLANT, SPENAVO 272337

This despatch is to be considered a war warning X Negotiations with Japan looking toward stabilization of conditions in the Pacific have ceased and an aggressive move by Japan is expected within the next few days X. The number and equipment of Japanese troops and the organization of naval task forces indicates an amphibious expedition against either the Philippines Thai or Kra peninsula or possibly Borneo X. Execute an appropriate defensive deployment preparatory to carrying out the tasks assigned in WPL46 X. Inform district and army authorities X. A similar warning is being sent by War Department X. Spenavo inform British X. Continental districts Guam Samoa directed take appropriate measures against sabotage.

Copy to WPD, War Dept.

Defense Document 1500-U-5

Excerpt from the testimony of General George C. Marshall before the Joint Committee on the Investigation of the Pearl Harbor Attacl Congress of the United States, Seventy-Ninth Congress, Second Session - December 8, 1945.

.

General MARSHALL. This plan was to meet a probable, as we unde

stood it, Japanese operation to the south of the China Sea. (3235) Senator FERGUSON. Well, were you familiar with the fact

that Mr. Churchill made the statement sometime before the war started, as far as America was concerned December 7, that in case Japan attacked America they would be in with us in 1 or 2 hours, or whatever the time was? General MARSHALL.

I have a recollection of some such statement. Senator PERGUSON. Could that have been in reply to this plan

then?

General MARSHALL. I do not know.

Senator FERGUSON. Were they to come in if Hawaii alone were to be attacked?

General MARSHALL. I could not answer that, sir. Senator FERGUSON. General MARSHALL. Or was it a one-sided plan? I do not think it was one-sided.

Senator FERGUSON. I just want to know what your opinion is on

General MARSHALL. It says "A direct act of war by Japanese armed forces against the Territory or Mandated Territory of any of the associated powers." That is a very general statement, and can cover Hawaii also. "It is not possible to define accurately what would constitute 'a direct act of war.' It is possible for a mino incident to occur which, although technically an act of war, could be (3236) resolved by diplomatic action. It is recognized that the decision as to whether such an incident is an act of war must lie with the Government concerned."

Senator FERGUSON. I am trying to find out whether this plan

went into effect prior to December 7.

General MARSHALL. I am quite certain it did not go into effect

because it never was implemented, sir.

Senator FERGUSON. On page 25, it says, at the bottom of the page - will you read that (b), the last paragraph? General MARSHALL (reading):

The operating of Chinese guerilla forces armed, equipped, and directed by the associated Powers. Steps have already been taken by the British Government to organize such operations. I is recommended that the United States Government organize similar guerilla forces.

Senator FERGUSON. Did we ever organize those, to put this plan into effect?

General MARSHALL. So far as I know, prior to December 7, 1941,

we did not, as far as I can recollect.

The one action, aside from sending supplies into China, that I do have a very definite recollection of is equipping the air force the Flying Tigers.
Senator FERGUSON. The Volunteer Air Corps?
General MARSHALL. Yes; because I took the action to get (3237)

them the planes personally.

Senator FERGUSON. What was the Volunteer Air Corps?

General MARSHALL. The Volunteer Air Corps was a force of airmen, combat planes, P-40's, I believe, furnished by the United States, and operated by volunteer officers from the United States, I think, of the Army and Navy, and there may have been even civilians in it. I am not quite certain.

Some of them were reserve officers, and they were relieved from active duty, and released so that they might go into the employ of the Chinese Government.

Defense Document 1500-U-5

The planes were obtained - is there any interest in that?

Senator FERGUSON. Yes, sir. General MAKSHALL. The planes were obtained on the basis of an English contract for planes, I think, with the Curtiss Co., and whe that contract had been fulfilled, it was possible for the plant to turn out a certain number of plane; during the next few months, if they immediately started, within 10 days, using the parts that were then available; otherwise their assembly lines would change.

Under the contract arrangement we had, which controlled the Curtiss Co.'s operations with the British, our Government, meaning the West Department in general and Air Connections are recorded in not the contract.

the War Department in general, and Air Corps people in particular, could control the question (3237) of whether or not those planes should be manufactured beyond the contract terms.

The problem was to obtain planes immediately for the Chinese. The planes which would have been fabricated out of this availab! extra material of course would not have been completed for 3 or 4 months.

We could kill that, so far as the British getting the benefit of those additional planes, or, as I used it, we could, on a trade basis, require them to take immediate delivery of completed planes that were going to them, to the Chinese, and we later would allow them to take these additional planes that were manufactured from

the accumulated materiel.

(3239) I saw Mr. Sumner Welles and he took up the adjustment with the British, and they submitted to that condition, and we got 50 in January or February, and 50 more in February or March. They were all for the Flying Tigers; they were sent out to the Far East. The men that were recruited by the Chinese and we released where they happened to be reserve officers, also, proceeded to the Far East.

My next recollection of the matter is while we had obtained the planes on that basis by a twist of the British contract, we now found ourselves in the predicament of having to provide the guns and ammunition, which we did not have available, and we had a hard time arming the planes.

That was the one definite force that I recall, prior to December 7, 1941, we organized to the extent that I have just described.

Senator FERGUSON Now General was that an activation of this

Senator FERGUSON. Now, General, was that an activating of this

Exhibit 50 plan?

General MARSHALL. I do not think it was that. It came actually out of a visit here of T. V. Soong with the head of the Chinese Air I took them out to my house for lunch and they made an impressive picture of the circumstances and the great good such action would do and I immediately undertook the obtaining of that materiel. That was without regard to this plan, and what I was referring to here is the (3240) continuation of that.

(Pages 1228 - 1230, Part 3 "Pearl Harbor Attack".)

D. D. 1500-V-1 Letter from Admiral H. R. Stark to Admiral J. O. Richardson 17 December 1940. OFFICE OF THE CHIEF OF NAVAL OPERATIONS Washington, Dec. Secret The Chief of Naval Operations To: The Commander in Chief, U. S. Fleet. Subject: War Plans - Status and Readiness of in View of Current International Situation. Reference: (a) Cinc's Secret Letter A16/01705 of October 22, 1940 1. In reply to your recommendation in the above letter that a new war plan be issued, you are informed that Navy Basic War Plan - Rainbow No. 3 (W.P.L. 44) has recently been completed. Four advance copies have been forwarded to you by officer messenger. The finished copies of this plan, plus such revisions of WPL-42, Navy Basic War Plan - Rainbow No. 1, as have been found desirable for making parts of that plan usable with Painbow No. 2 will be distributed as soon as practicable through Rainbow No. 3, will be distributed as soon as practicable through the Registered Publication Section. War Plan Rainbow No. 3 is designed to provide against the most imminent and difficult war situation which may confront the United States in the near future. It is, therefore requested that the Commander in Chief prepare as soon as practicable the operating plans for a war envisaged by Rainbow No. 3.

3. The Chief of Naval Operations has, in the past, kept the Commander in Chief advised as to all matters within his own knowledge which related to current national policy and pending knowledge which related to current national policy and pending national decisions. This past practice will be continued in the future. However, the Commander in Chief is doubtless aware that the changing world military situation will continue to affect policy, and thus will influence plans for the war operation of the naval forces. It is, of course, impracticable to draw up and to issue new Navy Basic War Plans when merely miner changes in policy occur. The Chief of Naval Operations considers that Rainbow No. 3 is, in its major aspects, suitable for all probable situations which may arise in the near future where the principal portion of the national effort is directed westthe principal portion of the national effort is directed westward. Under study now by the naval and army officials are plans based on assumptions requiring the exertion of the principal portion of the national effort to the eastward (Rainbow No. 5), and also a plan, somewhat similar to Rainbow No. 1, involving the defense of the entire Western Hemisphere against attack from both the east and the west (Rainbow No. 4). So far as now can be foreseen, these three basic plans should be adequate to guide mobilization, initial deployment, and initial operations under all contingencies which are foreseeable at present.

4. In view of the above, it is believed unnecessary to comment on the present applicability of the Orange War Plan, as that Plan was drawn up to guide the prosecution of a war under circumstances which do not how exist. The irgency of this document is such that it will not reach the addressees in time by the next available officer courier. The originator therefore authorizes the transmission of this document by registered mail within the continental limits of the United States. /s/ H. R. Excerpt from Exhibit No. 32 of the Joint Committee on the Investigation of the Pearl Harbor Attack - Congress of the United States, Seventy-Ninth Congress, First Session.

EXHIBIT NO. 32

MESSAGES BETWEEN WAR DEPARTMENT AND HAWAII FROM JULY 8 to SEPTEMBER 7, 1941

(15) 28 November 1941 from Western Defense Command to Marshall. Subject: Reply to Marshall warning.

(15)

Secret

Received: November 28, 1941. 11:18 PM

From: HQ WDC Presidio of San Francisco, Calif., To: General George C. Marshall November 28th:

Report following measures taken as per your radio Nov twenty seven: Your radio paraphrased to Commanding Generals ADC, Second Air Force, Fourth Air Force, Ninth CAD, Pecific Coastal Frontier Sectors, Ninth Corps Area and Commandants Eleventh Twelfth and Fifteenth Naval Districts. All harbor entrance control posts continuously manned. One gun battery each harbor defense continuously alerted. Protection against sabotage and other subversive activities intensified. Six infy battalions and necessary motor transportation alerted so as to be instantly available to CG NCA to carry out his missions under Rainbow Five. Constant contact being maintained with corps area and naval district commanders and full cooperation assured. PCF, sector and subsector plans Rainbow Five practically completed and necessary reconnaissance being made to carry out defense of critical areas. Two rifle companies furnished CG SF P of F for guard duty and one company furnished to CG NCA for internment aliens at Angel Island. Paren in connection this report see my radio to CG GHQ Nov twenty fifth which recommended that WPL five two be extended to include Pacific Coast and Japanese vessels and which outlined steps taken by me in preparation therefor. As Air Forces as well as other Army forces will be involved in the execution of WLP five two or the preparatory stage of Rainbow Five it is strongly urged that I be authorized to direct operations of Air Forces in defense (15A) of the PCF or that instructions be issued specifying air action and that I be furnished a copy of such directive. Should hostilities occur this command now ready to carry out tasks assigned in Rainbow Five so far as they pertain to Japan except for woeful shortage of ammunition and pursuit and bombardment planes which should be made available without delay.

DeWITT, Commanding.

Confidential.

Message of Generalissimo Chiang Kai-shek to President Roosevelt. whole military situation in China. I have communicated the following whom Front draft of the till standard a charles to but did not do the first will to Mr. Winston Churchilly

"Intelligence in which I have complete confidence shows that the stant and for Japanese are determined upon an attack against Yunnan, from Indo-China in order to the Kunhing and to cut China's lines of communication with Britain and the United States. Preparations are already on foot and the attack may be expected shortly. This is in my view the first step in their policy of expension either northward or couthward, and I feel therefore that I should bring to your notice certain facts and aspects of the situation. Indeed I feel if my uty and my right to impress upon

Tunnen "pull heve ver "Conce Kunning is teken, the Japanese would be rid of all fear of attack in the rear. You will, I feel sure, be the first to see that its and it is centure is not merely one objective of Japan's var of aggression on (2) its China but is a first and necessary sten to free herealf for fresh entermission. In you will appreciate how vitally the coming battle will bear upon the safety of all countries on the Pacific, upon yourselves and ourselves alike.

"You know you may count upon me to do my utmost to defend Kunming. and bolieve me when I tell you that my armies can do it. But you know as I do that I have no air force. And without an air force what can our stall army do against another that is strong in the air ? A glance at the map now of will show that if the city falls, Ohina will be out off from supplies of the outside, and her armies will be encircled and deprived of all contectded and logist with yours and those of her other friends. And moreover the morale of the bigod the Chinese army and Chinese people will be shaken to its foundation, "Courage and Chinese people will be shaken to its foundation, "Courage and Chinese people will be shaken to its foundation, "Courage and Chinese people will be shaken to its foundation, "Courage and Chinese people will be shaken to its foundation, "Courage and Chinese people will be shaken to its foundation, "Courage and Chinese people will be shaken to its foundation, "Courage and Chinese people will be shaken to its foundation, "Courage and Chinese people will be shaken to its foundation, "Courage and Chinese people will be shaken to its foundation, "Courage and Chinese people will be shaken to its foundation," "Courage and Chinese people will be shaken to its foundation, "Courage and "Coura morale has stood for more than four years on the eastern frombs where our friends cannot directly reach us. It would be gravely menaced by a variation Japanese triumph on the one front where as all the nation knows the address armed forces of our friends are within a hand's reach. For the first time in this long wer a real collapse of resistance would be possible.

** For more than four years now Ohing has kept some five million mem in the field and thus amobilisms the (3) man-power of Japan. The Amplications of this must be blear to your indeed I think they are already recognised by yourself and all other friends of China. If Kunning fell, Japan would then be able to cast all caution away and turn her whole might elsewhere. The coming battle is therefore not morely a question of victory or defeat of China but the meace and security of the Pacific hong upon it. Indeed it is not too much to say that the outcome of

Defense Doc. No. 1500-V-4

the European (?) war may hang upon it.

"If China had the air force she needs, I should be making no appeal to you, because I should feel confident of our sbility to defeat the invaders. But we have nothing that can be called an air force to match against what the Japanese would bring to bear upon us, for we may be sure that they will use their finest and their strongest. If however in the battle the Japanese sir force can be checked or even smashed, her power to enter upon what I have called fresh-enterprise will be much diminished. It is true that her navy will remain to her, but with that she can do little without the strength in the sir without which there would be an end to her schemes of expansion. From then on her submission could be brought about by political and economic pressure. Do not let us therefore make mistakes as they have made elsewhere in this (4) war, and let the Japanese attack us, as they mean to do, one by one, I am most asking you to declare war upon Japan. I merely wish to leave you in no doubt shout the situation in which I find myself, so make it clear that I am no match of the enemy in the sir, to tell you what this means and to suggest a remedy. The American volunteer air force now under trai. ne is good but very small. Our only hope is that the British air force in Malaya, with American cooperation, may come into action and support the American volunteers and the existing Chinese air force. The British air force could Coperate as part of the Chinese air force or assume the role of an International volunteer force. The result would be to save China and to save the Pacific.

"You might feel at a first glance that this would involve you in war with Japan while you are fighting with such corrage in Turone and the Middle Best. I see things otherwise. I do not believe that Japan feels that she has the strength to attack so long as the resistance of China persists. But once she is rid of this, she will attack you as and when it suits her and whether or not she is - - - by such action on your part as I have now suggested. It would be impossible to minimize the importance of British air action in Yunnan, for upon this the fate of democratic cause will (5) turn. China has reached the most critical phase of her war of resistance. Her ability to defend landward approaches to Singapore and Burms now depends primarily on British, and American willingness to cooperate in the defense of Yunnan. If the Japanese can break our front here we shall be out off from you, and the whole structure of your own air and naval coordination with America and the Netherlands East Indies will be seriously threatened in new ways and from a new direction. I should like to express, with all the strength at my command, the conviction that wisdom and foresight demand that China be given the plea that I have indicated. Nothing else can ensure alike the defeat of Japan and the success of the countries now resisting aggression.

I have also discussed the strat tic subject matter of the foregoing letter with Brigadier-General Magruder and have asked him to convey to you what I consider to be the decisive importance of the campaign in Yunnan. In addition I should like to urge on you my conviction that British determination in dealing with Japan waits at tresent moon the lead and stimulating influence of America; if the United States would have on its air arm in the Philipping to provide either an active unit ar a reserve force in the combined operation. I am convinced that unless Japan is checked sharply and at once, she is on the verge of winning a position from which she can deal with each of us separately and in her own time. The opportunity to check her is a fleeting one. You 6) are, Mr. President, recognized as the leader in the front of democratic nations fighting aggression. I feel sure that you will move with the replacey that the urgency of the moment demand. It is now

themselves, sit back, and wait until the aid arrives. For this reason it might be well not to promise them too much. One other point should be mentioned. What Major McHugh recommends is war-like action by the United States and Britain against Japan - in short, de-facto war with Japan, If we are going to fight Japan, rather than transporting our men and equipment to far-off West Yunnan province, thus placing ourselves under all the handicaps of difficult transportation, it would seem more sensible to attack the Japanese supply lines and home bases from our already established bases, thus diverting their attention from the Burma Road.

Part 1. Especial attention Secretary of War and Chief of Staff: The Generalissimo, who has been absent since our arrival, received me today, accompanied by MacMorland. After exchange of messages and amenities he expressed deep appreciation for the sending of the mission.

In order to get his reaction to the objectives of the mission I outlined my conception of the methods to be employed in making available the assistance afforded by lend lease material and services. I suggested five different military problems to which lend lease material was applicable and regarding which our personnel could collaborate on the solution. These were: 1, the communications problem; 2, the aviation project; 3, the supply of equipment to reorganized army forces; 4, the supply of raw materials; 5, the projects for training in and maintenance of new material.

Part 2. He made a note of these five points and expressed satisfaction with this method of approach, then quickly singled out aviation as the most pressing problem. He stated bluntly that he would like the mission to take over the control and development of his aviation service, disregarding apparently the Chinese air force and referring to Chennault's volunteer force as the only aviation that counted.

He requested with emphasis that a high ranking aviation officer be sent to take over his air force.

(2) I had no opportunity to comment on these points.

Becoming intently earnest he seid there was another emergency about which he wished to ask immediate assistance. More follows.

BUTTON TO CONTURNE

Part 3. The Japanese, he know, were preparing to attack Kurming from Indo-Chine and cut the Burms Road. He expects the attack by the end of November. By a concentration of his land forces he could resist this attack, he said, but only if he had air support. Then, queried later, he insisted that he had the resources to defeat the Japanese if air assistance were forthcoming. The generalisamo insisted, and rightly, that Chinese resistance would and if Kunming were lost. In his enalysis he ergued that Kunming was the key to the Pacific, if it fell, Chine would fall, and the attack on Malay Asia would inevitably follow. Wer in the Pecific then, was a curtainty. If Chine could hold, peace in the facific might be saven. But China must have air support, he remested. The British should reinforce the American volunteer unit. They must be convinced of the necessity of this course of action. Although not so expressed, it was to be inferred that no other assistance would be forthcoming in time, Not once did he mention American reinforcements of any kind, pleading the critical situation he repeatedly said that only British oir support could save China and peace in the Pacific.

Part four. The generalissimo then asked directly that I inform Washington of the threatening situation at once, and wrge that the President intercede with London to make available the Singapore Air Forces to support his defense. Also he requested me personally to appeal to the British commander in chief in Singapore to the same effect. Para. Quoting some announcement of the administration to the effect that a movement (3) southward by Japan would be considered inimical to American interests, he argued that our govt could properly interpret an attack on Kunming in that light. Even worse, since it would be the first item in a more effective movement south if Chinese resistance were eliminated he added that with the Burma Road out; America's right to trade with China would be infringed.

Pert 5. He then nled that the Promident be urged to bring diplomatic pressure on Japan and to appeal as well to Britain jointly to wern Japan that an attack upon Kuming would be considered inimical to our interests. This course, he believed, would cause Janan to desist.

In the circumstances, I had no concertunity to turn the interview into channels in which I was authorized to act. I seized one opportunity to point to the critical deficiency of operations on the Burma Road that the success of the defense depended upon improving the traffic there whether or not the British gave all support. I further reminded him that an argument the British might offer for refusing sumbort would be their inability to supply their air units with the rood in its present condition. With respect to the road I made clear that the mission was prepared to offer technical assistance in improving the conditions but that the political complications would have to be cleared by the · SEPTE THE SWEET OF Chinese themselves. Angelia in the second

Part 6. The generalissimo informed me that he had taken up the question of aviation support with the British Ambassador on several occasions. Madame Chiang interjected that the Chinese had given assurances of support of large land forces if Singapore were attacked, but that Britain refused to give assurances of air support if Kunning were attacked, unless British territory wre invaded.

I told the generalissimo that I could transmit this request to the Secretary of War. Section - partial agreement some superior parties as a parties as

Charges Print Matteres

Continued by a party of said

(4) Previous to the interview I had drafted a radio on the subject of the probability of an attack on Kunming. Present indications point strongly that way. If successful, there is little doubt that China's resistence would end. Also it is doubtless true that without effective air support the Japanese might succeed in this decisive effort.

Part seven. It may not be an exaggeration to say that Kunming momentarily has become the key to the Pacific. There is no combat value in the Chinese air force. The American volunteers alone at present strength and as presently equipped are ineffective and will not be ready for combat for several months. Increments of lend lease eviation material contemplated will be too little and too late. Only British forces at Singapore, or perhaps organized units from the Philippines would be available in time to afford effective support to China.

I have discussed the interview with our Ambassador and he has read this radio.

MAGRUDER

D. D. 1500-W-1 Letter from Admiral C. C. Bloch via Admiral Richardson to Admiral Stark - 30 December 1940. C-A16-1/A7-2/MD14 (629)OFFICE OF THE COMMANDANT FOURTEENTH NAVAL DISTRICT AND Navy Yard, Pearl Harbor, Hawaii, U.S.A. 30 Dec. 1940 CONFIDENTIAL Commandant, Fourteenth Naval District. The Chief of Naval Operations. Commander-in-Chief, United States Fleet.... From: To : Via: Situation Conserning the Security of the 'Fleet and the Present Ability of the Subject: Local Defense Forces to Meet Surprise Attacks. Opnav dispatch 092135 of October 1940. Opnav dispatch 182128 of October 1940. (a) References: (b) Chief of Navel Operations' personal letter addressed to CINCUS dated 22 (c) November 1940 (copy sent to Com 14). Com 14 dispatch 150055 of October 1940. Com 14 dispatch 220230 of October 1940. (d) 1. In view of the inquiries contained in references (a), (b) and (c), I consider it desirable to write this letter to set forth the present ability of the Fourteenth Naval District to meet surprise hostile attacks of an enemy with the equipment and forces at hand. AIRCRAFT RAIDS. 2. Aircraft attacking the base at Pearl Harbor will undoubtedly be brought by carriers. Therefore, there are two ways of repelling attack. First, by locating and destroying the carrier prior to launching planes. Second, by driving off attacking bombers with anti-aircraft guns and fighters. The Navy component of the local defense forces has no planes for distant reconnaissance with which to locate enemy carriers and the only planes belonging to the local defense forces to attack carriers when located would be the Army bombers. The Army has in the Hawaiian area fifty-nine B-18 bombers. All of these are classified as being obsolete. The model is six years old and the planes themselves are five years old. Therefore, it is my opinion that neither numbers nor types are satisfactory for the numbers intended. New herbing planes are expected for the purpose intended. New bombing planes are expected sometime in the future. However, not before July 1941. For distant reconnaissance, requisition would have to be made on the forces afloat for such as could be spared by the Fleet. To drive off bombing planes after they have been launched will require both fighting planes and anti-aircraft guns. The Army has in the Hawaiian area thirtysix pursuit planes, all of which are classified as obsolete. Some of them are six years old and some of them are four years old. In numbers and models, there is a serious deficiency existing. New fighters are expected when the P-40 PURL: http://www.legal-tools.org/doc/32e619/

D. D. 1500-W-1 Letter from Admiral C. C. Bloch via Admiral Richardson to Admiral Stark - 30 December 1940. C-A16-1/A7-2/MD14 (629)OFFICE OF THE COMMANDANT FOURTEENTH NA AL DISTRICT hin) Navy Yard, Pearl Harbor, Hewaii, U.S.A. CONFIDENTIAL 30 Dec. 1940 Subject: Situation Concerning the Security of the Fleet and the Present Ability of the Local Dorense Forces to Meet Surprise Attacks. is in production to the extent that the 185 projected for Hawaii can be delivered. This does not appear to be pro-bable before the end of 1941; this number does not appear adequate. The Army is charged with the protection of the Pearl Harbor base by anti-circraft guns. There are in Hawaii twenty-six fixed 3 danch gums and forty-four mobile 3-inch guns. There are projected twenty-four more, to be delivered in 1941. There are no 37-millimeter and only 109.50 caliber out of the projected 120.37-millimeter and 306.50 caliber machine guns. The Army plans to place the greater part of the 3-inch guns around Pearl Harbor and only a few near other military objectives. In my opinion, it will be necessary to increase the numbers of guns around Pearl Harbor greatly to have any semblance of anti-aircraft defense. Furthermore, I express my doubt as to the efficiency of a 3-inch gun with a 21-second fuse for driving off high altitude bombers. The

a 21-second fuse for driving off high altitude bombers. The Army has made no plans for the anti-aircraft defense of Lualualei or Kaneoho; furthermore, it will be necessary to have a considerable concentration of anti-aircraft guns to defend the shipping terminals and harbor of Honolulu in order that lines of communication may be kept open. With a limited. knowledge of the density of anti-sircraft barrages abroad, I am of the opinion that at least 500 guns of adequate size and range will be required for the efficient defense of the Hawaiian area. This number is in addition to 37-millimeter and .50 caliber machine guns.

In addition to the above, the Army has planned an aircraft warning service which will consist of eight Redar stations. Three of these stations are fixed and five are mobile. When completed at an indefinite time in the future, this warning net should be adequate.

DEFENSE AGAINST SUBMARINES. 3.

The ideal defense against submarines would be conducted by patrol vessels and aircraft working in conjunction. The district has no aircraft for this purpose.

Recency, there have arrived here three vessels of Destroyer

Division EIGHTY which is assigned to the local defense forces.

These vessels have listening gear and, when repaired and ready

for service, will be a valuable contribution for anti-submarine and escort work. A large number of patrol vessels will be required for anti-submarine work in the vicinity of Oahu and the other islands. At a sent, the district has none and request-would have to be made on the Fleet for such vessels and planes as could be spared for this most important work. No anti-submarine nets are planned, nor are any considered desirable. Anti-torpedo nets are projected for the

D. D. 1500-W-1 Letter from Admiral C. C. Bloch via Admiral Richardson to Admiral Stark - 30 December 1940. C-A16-1/A7-2/MD14 (629)OFFICE OF THE COMMANDANT FOURTEENTH NAVAL DISTRICT AND Navy Yard, Pearl Harbor, Hawaii, U.S.A. CONFIDENTIAL 30 Dec. 1940 Situation Concerning the Security of the Fleet and the Present /bility of the Local Subject: Defense Forces to Meet Surprise Attacks. entrances of Honolulu and Pearl Harbor. They will probably be delivered about 1 Merch 1941. The net depot will be completed somewhat later. DEFENSE AGAINST MINES. The district has recently built and equipped one sweep barge and three tugs are being equipped for towing and energizing the coil. This barge can probably look out for Honolulu and Pearl Harbor until such time as it is seriously injured. The district has no vessels available for use as sweeps for anchored mines. A number of mine sweepers are being built or purchased, but their delivery dates here are uncertain. A large number of sweepers will be required in order to keep the harbors of Pearl Harbor, Honolulu and Kaneohe clear and, in addition, Hilo on Honolulu and Kaneone clear and, in addition, Hilo on Hawaii, Kahului and Lahaina on Maui, and Port Allen and Newiliwili on Kauai. With the delivery of sweepers now being built or purchased, the general situation will be improved immeasurably. 5. DEFENSE AGAINST BOMBARDMENT. The coast defenses of the Army are considered adequate except that Kaneohe receives very little protection from the batteries. 6. SABOTAGE. There are two tank farms, the upper and the lower. The lower is entirely contained in the government reservation and, by the use of roving patrols, is considered reasonably secure. The upper farm is adjacent to a public highway. The farm is surrounded by an unclimable fence and each tank with an earth barn. Its chief exposure is along the highway. To counteract this, three elevated sentry stations have been erected, each equipped with searchlights. This enables sentries to keep a continuous lookout over the entire fence line day and night; the upper farm is considered fairly secure. WATER AND ELECTRICITY SUPPLY. Recently, a guard house has been erected and an arrangement has been made, the Marines alternating with the Army, for constant guard on the water supply. A constant guard is kept on the electric supply lines through which outside power is received. - 3 -PURL: http://www.legal-tools.org/doc/32e619/ CONFIDENTIAL

Subject:

Situation Conterning the Security of the Flour and the Present Ability of the Local Defense Porces to Meet Sumprise Attacks.

8. An elaborate system of photographic passes, search and examination is in effect. There are over 5,000 Civil Service employees who come into the yard each day. In addition, there are about 5,000 employees of civilian contractors and several thousand enlisted men. In addition to the above, there is a constant stream of trucks and vehicles of all descriptions terrying supplies, stores, et cetera. It is impossible to maintain absolute security without disraption of the work of the yard. However, surprise searches and periodic thops, at tetera, are in effect in order that the abert may be emphasized. The main gate has been strengthened to prevent rushing; there have been two drills for the purpose of giving surprise training to the yard garrison in the event of a surprise riot in the yard In addition to the above, a survey has been made not only of the yard but of all of the curlying stations, and every effort is being made to above holes and stop gaps. While the Commandant is not satisfied, he feels that the precautions taken are reasonably effective but that they are susceptible to improvement, which will be made as occasion warrants.

- 9. It should be borne in mind that until comparatively recently none of us in this country had very much conception of what measures were necessary and what provisions were desirable in order to effect any measure of protection against aircraft, against submarines, against mines and against subversive elements. The officers and men of this command have been alert, zealous and vigilant in executing all measures under their control in order to properly prepare the district for any exigencies.
- It should be assumed that the War Department is fully aware of the situation here and that they are proceeding vigorously with a view to overcoming deficiencies. It may be that they have failed to recognize the necessity for large numbers of anti-aircraft guns and pursuit planes. I suggest that the Chief of Naval Operations make inquiry from the War Department as to what their plans are and on what dates they predict that they will be accomplished and then, if the numbers and dates are not satisfactory, these features may be discussed at length.
- It is considered highly undesirable from my point of view that the War Department should in any way come to believe that there is lack of agreement between the Army authorities and Navy authorities here, or that the officials of the Fourteenth Naval District are pressing the Navy Department to do something in regard to Army matters.
